

Your roadmap to Peak Smart Home

01

Use the form on the Peak Smart website to let us know you are interested in participating.

Please note that submission of interest does not guarantee acceptance into the program.

03

Review and send a signed copy of the Participant Agreement to the Peak Smart Team.

02

Within two weeks of submission, you will receive an email confirming your eligibility for the program. If you have been accepted, a Participant Agreement will be attached to the email.

This is a preliminary approval of your participation. Final approval is subject to the electrician's assessment from the walkthrough done during installation, to further confirm your home's suitability and safety.

04

An electrician working with the program will reach out to schedule the installation.

06

During installation, the electrician will:

- complete a walkthrough to confirm your home's suitability and safety;
- install the device(s); and
- walk you through the device set-up and configuration.

05

Once your installation date has been confirmed, you will receive a Pre-Installation Checklist by email. Review the checklist to prepare for the installation.

07

Once the installation is complete, sign the Work Order Completion Form and provide the email you used to register on the web app.

08

You're now enrolled in the Peak Smart Home program!
