## Re: Potential Compensation Claims – Aishihik Water Use Licence Renewal

Yukon Energy's existing Water Use Licence (Licence HY19-016) for the Aishihik Generating Station (AGS) authorizes Yukon Energy to use waters by regulating flows at Aishihik and Canyon lakes, and flows in the East Aishihik River to generate renewable hydroelectricity at the AGS.

The existing Licence HY19-016 issued in February 2020 for a 3-year term expires on December 31, 2022. In order to ensure that the licence does not expire at the end of 2022, Yukon Energy is seeking to renew the existing licence for a term of five years, from January 1, 2023 to December 31, 2027 (the "proposed licence").

Further information regarding the Aishihik Generation Station Relicensing Project is available on Yukon Energy's website, [yukonenergy.ca](http://yukonenergy.ca).

### COMPENSATION RELATED TO THE 5-YEAR LICENCE RENEWAL

Yukon Energy wishes to identify individuals who believe that they will be adversely affected by the ongoing operation of the AGS over the 5-year renewal period and who may have a potential compensation claim under the Yukon *Waters Act*.

The following factors are relevant to determining compensation claims for the renewed licence period:

- provable and/or potential loss or damage;
- the extent and duration of the adverse effect, including the incremental adverse effect;
- the extent of use of water by persons who would be adversely affected; and/or
- nuisance, inconvenience and noise.

Yukon Energy is asking that any persons claiming potential damages related to the operation of the AGS during the renewal term, whether to property or from other causes, notify Yukon Energy in writing by April 4, 2022. Claimants may download Notice of Claim forms from Yukon Energy's website, [yukonenergy.ca](http://yukonenergy.ca), then send completed forms to Yukon Energy via mail, email or fax (see below).

Upon receipt of a Notice of Claim form, a representative from Yukon Energy will follow up with the claimant, or their designate, by phone, email or in writing to clarify submitted information and to discuss potential compensation.

Claimants that do not wish to address potential claims related to the renewed licence with Yukon Energy, or who are not able to agree with Yukon Energy regarding potential compensation, may provide notice to the Yukon Water Board as part of the future Yukon Water Board hearing process for the 5-year licence renewal. This hearing process is anticipated to occur in summer of 2022.
